

WARNING!

Winter covers are not safety covers
To avoid the risk of drowning,
Stay off the top of the cover.

Proper Installation of your Skirted Cover Will insure long life and Performance

CAREFULLY FOLLOW THESE INSTRUCTIONS

1. Properly prepare the pool to receive cover.
2. **Important:** Before placing cover on pool make certain that all of the exposed sharp edges which could contact the cover are protected.
3. Place cover on pool so skirted portion hangs over the side.
4. Insert cable through grommets on cover – under and over.
5. Bring cable thru both sides of tension clamp and thru the hole in turn key.
6. Pull ends through until cable appears reasonably taut around pool edge.
7. Attach cable brackets (supplied) to pool uprights below covers edge.
8. Loosen cable and place around the bracket, repeat on each upright.
9. Turn the tension handle clockwise until cable is tightened.

Note: to loosen cable tension, simply turn the tension handle clockwise about $\frac{1}{4}$ " and lift ratchet lock out of its position, allow to unwind.
